In this Class...

LEARN THE MOST USEFUL CAPABILITIES OF POWER PIVOT

A remarkable simplicity underlies the amazing power of Power Pivot. In fact, the most useful capabilities are conveniently the most learnable. This training focuses on that set – the things anyone can learn AND retain in a short period of time, while simultaneously building a confident foundation for future learning.

BENEFITS OF ATTENDING

1. Gain analytical superpowers.
2. Achieve better and faster results than with Excel alone.
3. Produce valuable metrics for your business that never existed before.
4. Learn "recipes" to solve complex problems create stand-out work.

Who should attend?

- Intensive users of Excel, particularly those responsible for reporting and analysis.
- Business leaders who need to mine their data for actionable insight – using existing resources and on short deadlines.
- Organizations looking to leverage Microsoft's ground-breaking PowerBI offerings.
- Business Intelligence and Database professionals looking to increase their professional agility and dramatically expand their capabilities.

INSTRUCTIONAL TEAM

What past students have said...,

"I cannot imagine work without the things I've learned about Power Pivot in this course."

-- E. Lim

"This curriculum is unique and very valuable. Actually priceless. Big thank you."

-- R. Abay

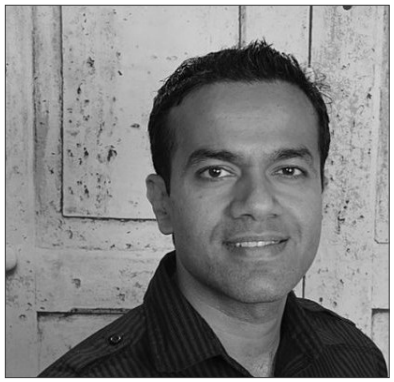
"I really appreciate your attention to detail and your unassuming approach. Mind blowing stuff! My life will be so much easier now."

-- Guruprasad D.

"The content in this course is super accessible, so retention is high ... Worth Every penny."

-- J. Hoffner

Your Instructor



Avichal "Avi" Singh most recently worked at Microsoft, where he built a successful Power Pivot driven BI platform serving 600+ users. Avi has a Masters in Computer Science from University of Washington and has spent past 10 years as an Analyst in IT industry across various verticals, helping transform data into insight.

Avi has personally experienced the amazing transformation and empowerment that Power Pivot can bring to our professional lives and his mission now is to spread the word and share the knowledge.

Our Founder

Rob Collie spent fourteen years at Microsoft designing and building functionality for the Excel audience, spanning from Excel 2003 to Power Pivot itself. He designed most of the v1 Power Pivot for Excel experience, as well as many aspects of Excel PivotTables.

Since leaving Microsoft in early 2010, Power Pivot has been Rob's entire focus – writing the world's most popular Power Pivot blog and best-selling Power Pivot book, running the world's first Power Pivot hosting service, and building hundreds of industrial-strength Power Pivot models and reports or industries including Retail, CPG, Pharma, Construction, and Energy . In addition, Rob has trained thousands of people in Power Pivot in person, remotely, and via his Online Video Training.

More Class Info...,

FOR ATTENDING POWER PIVOT FOR EXCEL YOU GET

- Exposure to best-in-class Power Pivot techniques, "recipes", & practical tips.
- Digital copy of Rob Collie's book, "*DAX Formulas for Power Pivot*".
- Networking opportunity with fellow professionals and Avi.
- Followup Q&A session after training, where after practice you can bring in any of your questions.

Prerequisites

SUGGESTED EXPERIENCE

- Light usage of Excel PivotTables (or similar data analysis tools)
- Familiarity with Excel functions like SUMIF and VLOOKUP are a plus
- A passion for acquiring Data Superpowers

(Note: Persons with Database, BI, Programming, or similar experience are quite qualified to take this course, even if lacking in Excel experience)

NOTE ABOUT SOFTWARE

Power Pivot requires Excel 2010 or 2013. If you have sufficient Excel experience with Excel 2007 or earlier, you can still succeed in the course, however, to maintain learned skills Excel 2010 or 2013 is necessary.
